To Whom It May Concern,

It is with great pleasure that I write this letter of recommendation for **Jesse Loko**. During their tenure as a **UI/UX Design Intern** at Nupixl Inc., Jesse proved to be a talented and motivated individual with immense potential for a successful career in design.

From the outset, Jesse demonstrated an impressive ability to quickly grasp the complexities of working within a fast-paced start-up environment. They showed a deep understanding of Nupixl's mission and were able to adapt to our dynamic workflows with ease. Jesse rapidly learned new design principles, tools, and processes, which allowed them to make significant contributions to our projects in record time.

Jesse's work as a UI/UX designer consistently exceeded expectations. Their designs were not only creative and visually appealing but also functional, meeting the needs of both our users and our product development team. Their ability to combine aesthetics with usability reflects a design maturity that is beyond that of many interns. In fact, much of their work holds the potential to meet professional standards and be deployed in live environments.

Based on my experience working with Jesse, I am confident that they will thrive in any professional setting they pursue. Their quick learning ability, creativity, and potential to produce top-quality designs make them an outstanding candidate for any UI/UX role.

I highly recommend Jesse Loko without reservation and am excited to see the impact they will make in the design field. Please feel free to contact me at 716-524-1079 or Elijah@Nupixl.com if you need any further information.

Elijah J Williams

Founder & Lead Product Developer at Nupixl
